## TRY RTNDF'S NEW BROADCAST JOURNALISM TEACHING TOOLS

RTNDF's High School Broadcast Journalism project is pleased to announce the launch of two new teaching tools designed especially for high school journalism teachers: **Reporting Across Platforms**, a new online course and our **Editor in the Newsroom** lesson plans.

▶ || **FREE ONLINE COURSE**  
[WWW.NEWSU.ORG](http://WWW.NEWSU.ORG)

Today's newsrooms are looking for journalists who are comfortable working with any medium, be it print, Web, video or audio. But this leaves high school journalism teachers – many of whom lack a broad range of multimedia experience – asking the question: where do we begin?

RTNDF, in association with News University, is offering a new course designed to introduce professional journalists, as well as journalism teachers and students to multimedia approaches in storytelling.

To learn more about the course and to register, visit [www.newsu.org](http://www.newsu.org).

### EDUCATOR IN THE NEWSROOM

Finding new ways to inspire students can be challenging, but with RTNDF's Education in the Newsroom lesson plans, high school teachers now have some fresh ideas.

#### Each lesson plan contains:

- Instructor bio with information on the educator's fellowship station and lessons learned.
- Detailed lesson plan with an Instructor's Guide to help facilitate classroom lectures.
- Handouts available for printing and distribution to students as a supplement to the lectures.

Some lesson plans include sample videos available for download, while other videos are available on DVD and can be ordered online.

For more information and to download the lesson plans, visit [www.hsbj.org](http://www.hsbj.org).

#### Education in the Newsroom Table of Contents
